

NETZSCH

We carry the follow products from Netzsch:

NEMO® Progressing Cavity Pumps

NEMO® Progressing Cavity Pumps are positive displacement pumps designed specifically for difficult pumping situations. They range in size from the industry's smallest metering and dosing pumps, to high volume pumping applications. With NEMO® NM Pumps, you can be assured of:

- Low shear rate on fluid being pumped
- Non-pulsating, accurate, reliable metered flow
- Volume practically unaffected by varying solid content
- Flow that is proportional to the pump's operating speed
- High viscosity and solids content pumping capabilities
- Self-priming
- Low, medium and high pressure pumping capabilities
- Non-vapor and air locking operation
- Low noise levels
- Flexibility in operation and mounting options
- No valves or close clearances to clog
