

We carry the following from Roper Pumps:

3600 Gear Pumps

Features

- Heavy duty cast iron helical gear pumps
- Bi-directional, self-priming
- Differential pressures to 125 PSI
- Up to 468 GPM
- Standard operation up to 212°F
- Can be built to operate up to 450°F
- Maintenance-free durability

7000 Series

Model 70200, the workhorse of our progressing cavity pump line, is ideal for handling a wide variety of materials which are often considered unpumpable. The 70200 offers the most economical solution for tough pumping problems like highly viscous, abrasive, shear sensitive, or solid-containing materials.
