

Seepex, headquartered in Bottrop, Germany, develops, manufactures and globally markets progressive cavity pumps for delivering low to highly-viscous, aggressive and abrasive media.

We carry the following from Seepex:

Range BN

- Short, compact design with directly flange-mounted drive (block design)
- Cost-efficient, since drive casing, elastic coupling and common baseplate are omitted
- Service-friendly due to plug-in connections between rotating unit and drive
- Conveying capacities: 30 l/h - 500 m³/h | 0.132 USGPM - 2,200 USGPM
- Pressures: up to 48 bar | 720 PSI
