

With 30 years of experience, Tarby has established itself as the premier alternative source for progressing cavity pumps and parts in North America.

We carry the following from Tarby:

Century III

Tarby's general purpose Century III Series pumps and parts replicate the Moyno® L-Frame pumps and are available in a wide range of models and flow rates. You can rely on the Century III Series pumps and parts to deliver dependable performance in a broad range of applications.

Century IV

The Century IV Series pumps and parts replicate the Moyno® J-Frame pumps and parts and feature an open throat design that is ideal for handling fluids with high solids content. Typical applications would include slurries, sludges and solids in suspension that would have difficulty transferring through standard flanged pump openings.

Century V

The Century V Series pumps and parts replicate the Moyno® 2000 pumps and parts and are rugged workhorses designed for heavy-duty service. They deliver reliable performance for all types of tough applications in a broad range of industries such as paper mills and wastewater treatment.

Century VI

The Century VI Series pumps and parts replicate the Moyno® Sanitary pumps and parts and feature 316 stainless steel construction and a quick disassembly design that allows for easy cleaning. The Century VI Series pumps and parts meet FDA requirements for the food processing, pharmaceutical, cosmetic and specialty chemicals industries.
