

Vertical Pumps

Vertical Turbine Pumps (VS1)

Vertical Turbine Pump. For deep well & irrigation, sumps, condensate, fire service, municipal, industrial and other applications.

VTP

HQ

Vertical Circulator and Mixed Flow Pump. For power generation, condenser, cooling water, flood services, storm water disposal, waste treatment plants, industrial services, sump drainage and other applications.

HX

KX

RX

WX

VMF

MX

Vertical High Flow Pump. Designed to handle a large volume of a wide range of liquids (in petroleum and chemical industry).

LS Barge

Vertical Double Suction Pumps (VS2)

Heavy Duty, Double Suction, Vertical Process Pump. For war water intake, cooling towers and other applications requiring large volumes of liquid with relatively high head.

DSV

DX

Vertical Axial Flow Pumps (VS3)

Vertical Turbine Generator. Pump and Turbine Generator mainly for hydroelectric needs but also for water transportation systems, dams, reverse osmosis, oil supply systems.

VTG

Vertical Axial Flow Pump. For all applications that require large quantities of water with low head, like drainage, waste water, flood control and others.

VAF

PV

PMR

VPO

PVD

Vertical Circulator and Mixed Flow Pump. For power generation, condenser, cooling water, flood services, storm water disposal, waste treatment plants, industrial services, sump drainage and other applications.

TR

Vertical Sump Pumps (VS4)

Sump Pump. For water, hydrocarbons, process water, river water, chemical solutions and other applications.

VSP

VSP Chem

Vertical Can Pump Diffuser (VS6)

Vertical Barrel Pump. For condensate, power plants, municipal, hydrocarbons, pipeline and refineries.

VLT

VMT

Cryogenic Pump. For cryogenic applications, liquid nitrogen and other liquid gases.

VLT Cryogenic

VLTV

Double-casing Volute (VS7)

Heavy Duty, Double Suction, Vertical Process Pump. For war water intake, cooling towers and other applications requiring large volumes of liquid with relatively high head.

DSV

DX

Vertical Submersible Pumps

Submersible Vertical Pump. For water, waste water, river water, rain water, irrigation & drainage, power generation, cooling water circuits and other applications.

STT

PVT

LKT

TRT

Vertical Dry Pit

Single Stage, Single Suction Mixed Flow Pump. For cooling water, general water, drinking water, rain water and sea water.

SDV

SKV
