

Between Bearing Pumps

Split Case (BB1, 1 & 2 stage)

Horizontal Split Case Pump Single Stage. For fire services, cooling towers, municipal, oil process, petrochemical, sugar industry, paper industry, pipeline, power plants and other applications.

HSC

HSD

HSR

ZW

Horizontal Split Case Pump Multi Stage. For high pressure applications (boiler feed, petrochemical, chemical, industrial), power plants and other applications.

HSM

Volute Casing Centrifugal Pump. For hydrocarbons, chemical solutions, water, sea water and other applications.

ZM

ZMS

ZLM

ZM I-II

Radial Split (BB2 1 stage)

Horizontal Double Suction Pump, Between Bearing Single Stage. For heavy-duty temperature process, process and industrial applications including: charge, injection and utility booster, and other applications.

HVN

J Line

Floating Dock Pump, Single or Multi-stage, Single Suction Segmental Type Pump. Wash-down pump in floating docks and for fire protection service.

LVZ

Radial Split (BB2 2 stage)

Horizontal Process Pump Two Stage. For refineries, oil fields, petrochemical plants, chemical plants and other applications.

RON

Floating Dock Pump, Single or Multi-stage, Single Suction Segmental Type Pump. Wash-down pump in floating docks and for fire protection service.

LVZ

Axially Split Multi Stage (BB3)

Multi Stage, Axially Split Casing Pump. For oil fields and terminals, crude oil and oil product pipelines. Water pipelines, fluid injection, high pressure services, power plants and other applications.

SM

SMI

Horizontal Process Pump Multi Stage. For refineries, oil fields, petrochemical plants, chemical plants, power plants and other applications.

JTN

Horizontal Split Case Pump Multi Stage. For high pressure applications (boiler feed, petrochemical, chemical, industrial), power plants and other applications.

HSM
